SKYLAB

THE SURGICAL EXPERIENCE

This is not rocket science !
SKYLAB MED

ABOUT

Skylab is a unique venue of international standing, dedicated to medical education and surgical training.

Thanks to its state-of-the-art facilities and equipment, the team offers a wide range of services and configurations tailored to every need:

- ✓ **Hands-on training & theoretical education**
- ✓ **Practice on anatomical specimens (CadLab) & dry bones**
- ✓ **R&D sessions**
- ✓ **Workshop**

Skylab dedicates its services to a wide audience: scientific societies, clinics and hospitals, surgeons, industry players, veterinarians, healthcare staff, etc.

★★★★★

A truly unique venue because of its location (who has ever seen a CadLab in the middle of vineyards!!). Unmatched for the welcome you receive, the cozy feel of the place and an optimal surgical experience. Nothing is missing in terms of equipment... Moreover, the variety of room sizes and their modularity let you adapt the configurations to your needs. The staff is very helpful and highly responsive. I highly recommend it +++

Exactech

SKYLAB MED

2 TECHNICAL PLATFORMS
at the cutting edge of technology

LAB 1

250m² | up to 60 surgeons

- 1 table for expert surgeons with video capture & mini amphitheater
- Up to 20 workstations
- 5 projection screens
- Laboratory technicians
- General instrumentation included
- Technicians & audiovisual equipment for capture & broadcast
- Medical equipment
- Daylight

LAB 2

50m² | up to 16 surgeons

- Up to 4 workstations
- 1 projection screen
- Laboratory technicians
- General instrumentation included
- Capture & broadcast possible
- Medical equipment on request

REGULATION

Rates compliant with MedTech Europe recommendations and below the reporting threshold of the French Medical Association (Ordre des médecins).

★★★★★

Skylab kindly hosted us for our latest European Esska Academy certification module. The facilities are first-class, offering incredible flexibility for teaching and collaboration.

The team is incredibly helpful and goes above and beyond what one usually expects. We are delighted to see them again in 2026, and hopefully beyond.

Esska Academy

SKYLAB MED

A UNIQUE COMPLEX
at the cutting edge of technology

Thanks to an extensive network of partners, the Skylab teams are able to meet all medical equipment needs.

Our infrastructure is specially designed to foster the learning and training of surgeons and, more broadly, of medical staff.

Equipment available:

- ✔ Surgical power tools & saws
- ✔ 15 ultrasound machines
- ✔ 2 image intensifiers (Ziehm 8000 Compact & Orthoscan)
- ✔ General instrumentation (surgical drapes, instrument washing))
- ✔ 10 arthroscopy towers (VIMS)
- ✔ Disposable consumables (scrubs, gowns, masks, gloves...)

A CENTER DEDICATED TO HEALTHCARE PROFESSIONALS

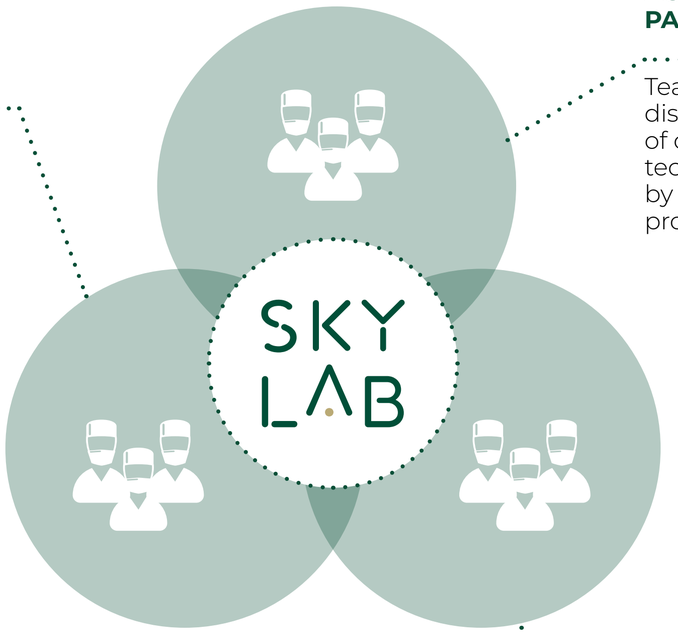

for training sessions
and R&D work

SCIENTIFIC SOCIETIES

Organization of events that count toward surgeons' certification

ACADEMIC PARTNERS

Teaching and dissemination of cutting-edge techniques by healthcare professionals

INDUSTRY PLAYERS & MEDTECH LABS

Product testing and technology dissemination

SKYLAB MED

★★★★★

Skylab is a superb venue. The teams are very involved and very kind. The setting is a welcome change from the usual professional venues, it's a very pleasant place. I recommend it 100%!

Dimitri L.

ADDITIONAL SERVICES

REGISTRATION MANAGEMENT
Skylab helps you manage and track participant registrations, send documents for electronic signature, and produce badges and certificat

ACCOMMODATION
The events team handles hotel bookings with partner hotels, ensuring compliance with the CNOM (French National Medical Council) reporting thresholds.

CATERING
Skylab offers a wide choice of catering and break formats for your events, and recommends restaurants near the training center or in the city center.

TRANSFERS
Trusted partners handle your transportation to and from Skylab, the train station, the airport and the hotel.

ACTIVITIES
Many activities are available to offer your participants a break between vineyards and coastline.

SURGICAL COURSE ORGANIZER

Specialists in organizing surgical courses, we support medical education stakeholders in the design, management and delivery of tailor-made scientific events.

With our expertise and our knowledge of stakeholders' needs, we take charge of the entire project, from defining the educational format to operational coordination, including budget monitoring, communication, participant management and partnership development.

Our comprehensive and personalized approach allows us to guarantee high-quality training, tailored to the scientific objectives and constraints of each project.

SURGEONS

ACCELERATING THE LEARNING CURVE

The S-curve, popularized by Everett Rogers to show how new ideas and technologies spread, also describes the trajectory of those who acquire skills in a new field of expertise.

Whitney Johnson (2022)

OBJECTIVE:
REACH MASTERY FASTER

OUR LEVERS:

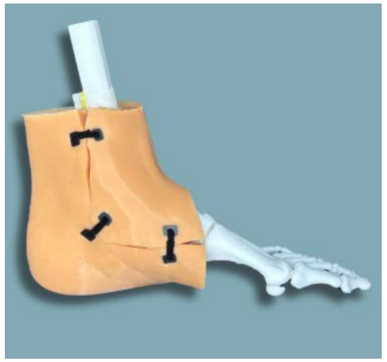

- **Innovative anatomical models:** multi-material 3D printing, in series or custom-made, as close to reality as possible, reproducing pathologies and traumas.

- **Assessment and feedback tools:** virtual reality headset to capture and share advice during practical sessions, feedback during and after the procedure, personalized educational content platform.

MULTI-MATERIAL 3D PRINTING

- ✓ Development of **new pathological simulation models**
- ✓ A progressive training **continuum**, from Sawbones models to cadaveric anatomical specimens, enabling surgeons to master procedures of increasing complexity while preserving cadaveric specimens for advanced training.

Arthro model®

ADDITIVE manufacturing of your dream
ADDIDREAM

RESEARCH & DEVELOPMENT

Skylab is engaged within a European ecosystem in a research process on the latest technologies serving surgeons, in order to develop tomorrow's solutions and protocols.

Skylab is a laureate of a Programme d'investissements d'avenir (Future Investment Program, PIA 4 – Sectors), part of the France 2030 recovery plan.

This program supports:

- ✓ The creation of an educational platform open to learners
- ✓ The development of a machine dedicated to producing reproducible fractures
- ✓ The development of deliberate practice to optimize knowledge transfer and shorten learning curves
- ✓ The creation of personalized 3D-printed pathological models with soft tissue

ETHICS COMMITTEE

A scientific and ethics committee was formed by Skylab to ensure respect for individuals and their remains in teaching and research in surgery.

The committee carries out the ethical review of the scientific, R&D and training programs hosted by Skylab and provides any useful advice to establish or maintain their design and execution at the highest level of ethical rigor.

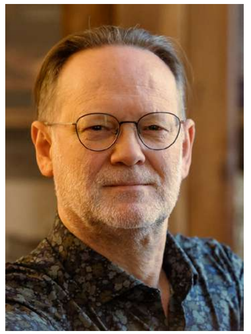

The committee has 4 members, all individuals with expertise in medical, scientific or ethical matters.

Mr Philippe Amiel
Lawyer and ethicist specializing in the medical-surgical field and Chair of the ethics committee

Mrs Victoria Chapeau
Lawyer specializing in victims' rights

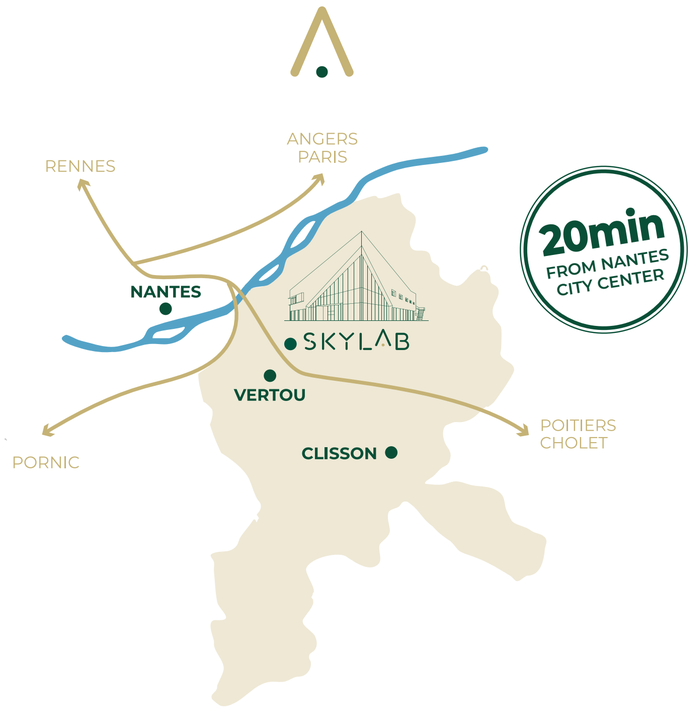

Prof. Philippe Liverneaux
Orthopedic surgeon, lead for deliberate practice

Prof. Jean-Yves Beaulieu
Orthopedic surgeon and Professor of anatomy
